*River Otters* clamber on logs or shore to search for a place to play. Fish is a favorite meal, but otters will also eat frogs, shellfish, and mice.

Watch for wildlife along this great side channel.

Low water in summer and fall.

W-13: pg 32

Many *Great Blue Herons* are likely to be seen at any time of year, cruising overhead, neck curved in an S-shape, or stalking fish and frogs in the shallows. Keep your distance to avoid alarming herons into flight.

Low water in summer and fall.
