

**STRAINERS!**  
 Fallen trees extending from the bank, large root wads sticking out of the water, and any other immovable object in the river with current flowing into it is a strainer. This kind of obstacle can stop you and your boat, and the pressure of the current against you and your craft can break your boat and make swimming away very difficult. Never get your boat broadside on a strainer, and avoid contact if at all possible.

- 185.0: Mill Race Park**  
 (Willamalane)  
 This park is a good place to start a trip in the Eugene area.
